PREFACE

Engineering Aptitude, as a subject, has been growing in significance across competitive examinations in India. Now, Union Public Service Commission (UPSC) has introduced this topic in Engineering Service Examination (ESE). We have immense pleasure in placing this book “**Engineering Aptitude** covering **Logical Reasoning and Analytical Ability**” before the aspirants of various competitive examinations, mainly ESE aspirants.

In writing this book, under the guidance of **Mr. Kanchan Kumar Thakur (Ex. IES)**, we have had in mind the needs and interests of students appearing for Competitive Examinations. Since, there is no book available in the market, particularly on **Critical Reasoning** mentioned in new ESE syllabi.

The discussion points focus on points of topical interest or on particular concept. Questions typical of those set in the examinations have been included to practice and to discover the extent of their knowledge. Keywords are printed in bold type to assist the student further in assimilating the information.
