

ENGINEERING MATHEMATICS

ESE | GATE | PSU's

2018

▶ **COMPLETE THEORY (ESE & GATE PATTERN)**

▶ **1386 QUESTIONS (LAST 25 YEARS OF ESE & GATE EXAMS) WITH DETAILED SOLUTION**

▶ **672 EXAMPLES FOR CONCEPTUAL CLARITY**

▶ **289 TOPICS COVERED**

ENGINEERING MATHEMATICS

(For ESE & GATE Exam)

(CE, ME, PI, CH, EC, EE, IN, CS, IT)

Salient Features :

- 289 topics under 31 chapters in 8 units
- 672 Solved Examples for comprehensive understanding
- 1386 questions from last 25 years of GATE & ESE exams with detailed solutions
- Only book having complete theory on ESE & GATE Pattern
- Comprising conceptual questions marked with '**' to save the time while revising

First Edition : 2017

PREFACE

We, the IES MASTER, have immense pleasure in placing the first edition of “**Engineering Mathematics**” before the aspirants of GATE & ESE exams.

Dear Students, as we all know that in 2016 UPSC included Engineering Mathematics as a part of syllabus of common paper for ESE exam as well as of a technical paper for EC/EE branch, while Engineering Mathematics already has 15% weightage in GATE exam. We have observed that currently available books cover neither all the topics nor all previously asked questions in GATE & ESE exams. Since most of the books focus on only some selected main topics, students have not been able to answer more than 60-65% of 1386 questions that have been asked in GATE & ESE exams so far. Hence to overcome this problem, we have tried our best by covering more than 289 topics under 31 chapters in 8 units. (One should not be in dilemma that 289 topics are more than sufficient. These are the minimum topics from where GATE & ESE have already asked questions). Since we have covered every previous year questions from last 25 years of each topic, students can easily decide, how much time to allocate on each chapter based on the number of questions asked in that particular exam. Again, we have included only those proofs that are necessary for concept building of topics and we have stressed on providing elaborate solution to all the questions.

It is the only book in the market which has complete theory exactly on ESE & GATE Pattern. After each topic there are sufficient number of solved examples for concept building & easy learning. The book includes such types of 672 examples. It also covers all the previously asked questions in which conceptual questions are marked with “*” sign so that students can save their time, while revising.

Having incorporated my teaching experience of more than 13 years, I believe this book will enable the students to excel in Engineering Mathematics.

My source of inspiration is Mr. Kanchan Thakur Sir (Ex-IES). He has continuously motivated me while writing this book.

My special thanks to the entire IES MASTER Team for their continuous support in bringing out the book. I strongly believe that this book will help students in their journey of success. I invite suggestions from students, teachers & educators for further improvement in the book.

Dr. Puneet Sharma

(M.Sc., Ph.D.)

CONTENTS

UNIT 1 : CALCULUS

1.1	Limits, Continuity and Differentiability	01 – 44
	(i) Function	01
	(ii) Limit of a Function	01
	(iii) Theorem on Limits	02
	(iv) Indeterminate Forms	04
	(v) L-Hospital Rule	05
	(vi) Fundamentals of Continuity	08
	(vii) Kinds of Discontinuities	10
	(viii) Properties of Continuous Functions	15
	(ix) Saltus of a Function	16
	(x) Function of Two Variables	17
	(xi) Limit of a Function of Two Variables	17
	(xii) Continuity of Function of Two Variables	22
	(xiii) Differentiability	23
	Previous Years GATE & ESE Questions	29
1.2	Partial Differentiation	45 – 65
	(i) Parial Derivatives	45
	(ii) Homogeneous Functions	49
	(iii) Euler's Theorem on Homogenous Function	50
	(iv) Total Differential Coefficients	52
	(v) Change of Variables	52
	(vi) Jacobian	56
	(vii) Chain Rule of Jacobian	59

(viii)	Functional Dependence	60
	Previous Years GATE & ESE Questions	63
1.3	Infinite Series	66 – 78
(i)	Expansion of Functions	66
(ii)	Maclaurin's theorem	66
(iii)	Taylor's Theorem	66
(iv)	Convergence and Divergence of Infinite Series	69
(v)	Methods to Find Convergence of Infinite Series	70
(vi)	Power Series	71
	Previous Years GATE & ESE Questions	72
1.4	Mean Value Theorems	79 – 86
(i)	Rolle's Theorem	79
(ii)	Lagrange's First Mean Value Theorem	80
(iii)	Cauchy's Mean Value Theorem	80
(iv)	Bolzanos Theorem	81
(v)	Intermediate Value Theorem.....	81
(vi)	Darboux Theorem	81
	Previous Years GATE & ESE Questions	84
1.5	Maxima and Minima	87 – 114
(i)	Increasing and Decreasing Functions	87
(ii)	Maxima and Minima of Function of Single Variable	88
(iii)	Sufficient Condition (Second Derivate Test)	89
(iv)	Maxima-Minima of Functions of Two Variables	89
(v)	Sufficient Condition (Lagrange's Conditions)	91
(vi)	Lagrange's Method of Undetermined Multipliers	94
	Previous Years GATE & ESE Questions	98
1.6	Multiple Integral	115 – 176
(i)	Concept of Integration	115
(ii)	Some Standard Formulae	115

Also Available COMBO PACK: **70 Tests + GATE 2018 Book**

(iii)	Some Important Integration and their Hints	116
(iv)	Definite integrals	117
(v)	Fundamental Properties of Definite Integrals	117
(vi)	Fundamental Theorem of Integral Calculus	118
(vii)	Definite integral as the Limit of a Sum	118
(viii)	Double Integrals	121
(ix)	Double Integrals in Polar Coordinates	122
(x)	Triple Integrals	127
(xi)	Change of Order of Integration	130
(xii)	Use of Jacobian in Multiple Integrals	133
(xiii)	Multiple Integral using Change of Variables Concept	134
(xiv)	Area and Volume in Different Coordinates Systems	136
(xv)	Arc Length of Curves (Rectification)	139
(xvi)	Intrinsic Equation of a Curve	139
(xvii)	Volumes of Solids of Revolution	141
(xviii)	Surfaces of Solids of Revolution	143
(xix)	Beta and Gamma Functions	144
(xx)	Properties of Beta & Gamma Functions	145
(xxi)	Leibnitz Rule of Differentiation under the sign of Integration	152
(xxii)	Improper Integral	153
	Previous Years GATE & ESE Questions	154
1.7	Functions and their Graphs	177 – 191
(i)	Cartesian Product	177
(ii)	Relations	177
(iii)	Types of Relations	177
(iv)	Functions	178
(v)	Types of Functions	178
(vi)	Some Basic Graphs	179
(vii)	Graph Transformation	185
	Previous Years GATE & ESE Questions	186

UNIT 2 : VECTOR CALCULUS

2.1	Vector & their Basic Properties	192 – 202
	(i) Vector	192
	(ii) Addition or Subtraction of Two Vectors	192
	(iii) Dot Product	193
	(iv) Angle between Two Vectros	193
	(v) Triangle Inequality	194
	(vi) Cross Product	194
	(vii) Area of a Triangle	194
	(viii) Area of a Paraelelogram	194
	(ix) Direction Cosines of a Vector	195
	(x) Direction Ratio of a Line joining Two Points	196
	Previous Years GATE & ESE Questions	199
2.2	Gradient, Divergence and Curl	203 – 229
	(i) Partial Derivatives of Vectors	203
	(ii) Point Functions	203
	(iii) Del Operator	204
	(iv) The Laplacian Operator	204
	(v) Gradient	205
	(vi) Directional Derivative	205
	(vii) Level Surface	206
	(viii) Divergence	211
	(ix) Curl (Rotation)	211
	(x) Vector Identities	213
	Previous Years GATE & ESE Questions	217
2.3	Vector Integration	230 – 248
	(i) Line Integral	230
	(ii) Surface Integral	232
	(iii) Volume Integral	233

(iv) Gauss' Divergence Theorem	234
(v) Stoke's Theorem	236
(vi) Green's Theorem	237
Previous Years GATE & ESE Questions	239

UNIT 3 : COMPLEX ANALYSIS

3.1 Complex Number	249 – 264
(i) Complex Numbers as Ordered Pairs	249
(ii) Euler Notation	249
(iii) Algebraic Properties	249
(iv) Geometrical Representation	250
(v) Modulus and Argument	250
(vi) Complex Conjugate Numbers	252
(vii) Cube Roots of Unity	252
Previous Years GATE & ESE Questions	255
3.2 Analytic Functions	265 – 280
(i) Neighbourhood of Complex Number z_0	265
(ii) Function of a Complex Variable	265
(iii) Types of Complex Function	266
(iv) Continuity of Complex Function	266
(v) Differentiability of Complex Function	266
(vi) Analytic Functions	267
(vii) Cauchy-Riemann Equations	268
(viii) Polar Form of Cauchy-Riemann Equations	269
(ix) Harmonic Functions	271
Previous Years GATE & ESE Questions	276
3.3 Complex Integration	281 – 310
(i) Contour	281
(ii) Elementary Properties of Complex Integrals	282
(iii) Cauchy Integral Theorem	285

(iv) Cauchy's Integral Formula	286
(v) Taylor Series of Complex Function	291
(vi) Laurent's Series	291
(vii) Zeros of an Analytic Function	292
(viii) Singularities of an Analytic Function	293
(ix) Types of Isolated Singular Points	293
(x) Residue	294
(xi) Cauchy-Residue Theorem	295
(xii) Methods of Evaluating Residues	295
Previous Years GATE & ESE Questions	298

UNIT 4 : DIFFERENTIAL EQUATIONS

4.1 Ordinary Differential Equations	311 – 341
(i) Definition of Differential Equation	311
(ii) Order and Degree of Ordinary Differential Equation	311
(iii) Non-Linear Differential Equation	312
(iv) Solution of Differential Equation	312
(v) Formation of Differential Equation	313
(vi) Wronksian	313
(vii) Linearly dependent & Linearly independent solutions	314
(viii) Methods of Solving Differential Equations	314
(ix) Differential Equations of First Order and First Degree	315
(x) Exact Differential Equation	316
(xi) Equations Reducible to Exact Form	318
Previous Years GATE & ESE Questions	322
4.2 Linear Differential Equations of Higher Order with Constant Coefficients	342 – 384
(i) Complementary Function	342
(ii) Rules for Finding the Complementary Function	342
(iii) Particular Integral	345

(iv)	Methods of Evaluating Particular Integral	345
(v)	Cauchy's Homogeneous Linear Differential Equation	353
(vi)	Legender's Homogeneous Linear Differential Equation	353
(vii)	Simultaneous Linear Differential Equation	357
(viii)	Variation of Parameters	357
(ix)	Differential Equation of First Order and Higher Degree	358
(x)	Clairaut's Equation	361
	Previous Years GATE & ESE Questions	363

4.3 Partial Differential Equations 385 – 395

(i)	Order and Degree of Partial Differential Equation	385
(ii)	Linear Partial Differential Equation	385
(iii)	Classification of 2nd Order Linear P.D.E. in Two Variables	386
(iv)	One Dimensional Wave Equations	387
(v)	One Dimensional Heat Equation	388
(vi)	Two Dimensional Heat Equation	389
(vii)	Laplace Equation	390
	Previous Years GATE & ESE Questions	392

UNIT 5 : NUMERICAL METHODS

5.1 Numerical Solutions of Linear Equations 396 – 404

(i)	Gauss-Jacobi Method	396
(ii)	Gauss-Seidel Method	399
	Previous Years GATE & ESE Questions	404

5.2 Numerical Solution of Algebraic and Transcendental Equations 405 – 431

(i)	Graphical Method	405
(ii)	Bisection Method	406
(iii)	Regula-Falsi Method	410
(iv)	The Secant Method	412
(v)	Newton-Raphson Method	413
	Previous Years GATE & ESE Questions	417

5.3	Interpolation	432 – 440
	(i) Interpolation and Extrapolation	432
	(ii) Methods of Interpolation	432
	(iii) Notation of Finite Difference Calculus	432
	(iv) Newton-Gregory Forward Interpolation Formula (for equal intervals)	433
	(v) Newton-Gregory Backward Interpolation Formula (for equal intervals)	434
	(vi) Newton's Divided Difference Interpolation Formula (for Unequal Intervals)	436
	(vii) Lagrange's Interpolation Formula (for Unequal Intervals)	437
	Previous Years GATE & ESE Questions	439
5.4	Numerical Integration (Quadrature)	441 – 456
	(i) General Quadrature Formula	441
	(ii) The Trapezoidal Rule	441
	(iii) Simpson's One-Third Rule	442
	(iv) Simpsons 3/8 th Rule	443
	Previous Years GATE & ESE Questions	449
5.5	Numerical Solution of a Differential Equation	457 – 475
	(i) Picard's Method	457
	(ii) Euler's Method	460
	(iii) Improved Euler's Method	460
	(iv) Modified Euler's Method	461
	(v) Runge-Kutta Methods	466
	Previous Years GATE & ESE Questions	471

UNIT 6 : TRANSFORM THEORY

6.1	Laplace Transform	476 – 501
	(i) Integral Transform	476
	(ii) Definition of Laplace Transform	476
	(iii) Properties of Laplace Transform	476
	(iv) Laplace Transform of Periodic Function	477
	(v) Types of Laplace Transform	477

(vi)	Evaluation of Integrals with the help of Laplace Transform	478
(vii)	Inverse Laplace Transform	478
(viii)	Properties of Inverse Laplace Transform	479
(ix)	Types of Inverse Laplace Transform.....	479
(x)	Convolution of Two Functions	480
(xi)	Unit Step Function	480
(xii)	Unit Impulse Function (Dirac Delta Function)	480
(xiii)	Existence Theorem for Laplace Transform.....	482
(xiv)	Initial Value Theorem	482
(xv)	Final Value Theorem	482
(xvi)	Application of Laplace Transform in Differential Equation	483
	Previous Years GATE & ESE Questions	484

6.2 Fourier Series 502 – 513

(i)	Periodic Function	502
(ii)	Fourier Series (Main Definition)	503
(iii)	Euler's Formula of Fourier Series	503
(iv)	Dirichlet's Conditions	505
(v)	Fourier Expansion of Even and Odd Function	506
(vi)	Half Range Fourier Series	508
	Previous Years GATE & ESE Questions	510

UNIT 7 : LINEAR ALGEBRA

7.1 Algebra of Matrices 514 – 548

(i)	Definition of Matrix	514
(ii)	Types of Matrices	514
(iii)	Product of Matrix by a Scalar	516
(iv)	Addition and Subtraction of Matrices	516
(v)	Multiplication of Matrices	516
(vi)	Minors of Matrix	518
(vii)	Cofactors of a Matrix	518

(viii)	Properties of Determinants	518
(ix)	Adjoint of Matrix	519
(x)	Inverse of a Matrix	519
(xi)	Conjugate of a Matrix	520
(xii)	Conjugate Transpose of a Matrix	520
(xiii)	Special Types of Matrices	520
	Previous Years GATE & ESE Questions	527
7.2	Rank of Matrices	549 – 567
(i)	Definition of Rank	549
(ii)	Elementary Transformations	550
(iii)	Equivalent Matrices	550
(iv)	Properties of Rank	550
(v)	Echelon Form	551
(vi)	Normal Form	553
(vii)	Elementary Matrices	556
(viii)	Computation of the Inverse of Matrix by Elementary Transformation	557
(ix)	Row Rank and Column Rank of a Matrix	560
	Previous Years GATE & ESE Questions	562
7.3	System of Equations	568 – 613
(i)	Linear Dependence and Independence of Vectors	568
(ii)	System of Linear Equations	570
(iii)	Methods of Solving Non-Homogenous System	572
(iv)	Methods of Solving Homogenous System	579
(v)	Diagonally Dominant System	583
(vi)	Gauss Elimination Method with Pivoting	583
(vii)	Gauss-Jordan Method	585
(viii)	LU Decomposition (Factorization) Method	587
(ix)	Dolittle Method	587
(x)	Crout's Method	590
	Previous Years GATE & ESE Questions	593

7.4	Eigen Values and Eigen Vectors	614 – 659
(i)	Definition	614
(ii)	Properties of Eigen Values & Eigen Vectors	615
(iii)	Similar Matrices	622
(iv)	Diagonalisation	622
(v)	Cayley-Hamilton Theorem	624
	Previous Years GATE & ESE Questions	628

UNIT 8 : PROBABILITY & STATISTICS

8.1	Permutation and Combination	660 – 697
(i)	Set	660
(ii)	Types of Set	660
(iii)	Venn Diagrams of Different Sets	661
(iv)	Fundamental Principle of Counting	663
(v)	Permutation	663
(vi)	Combination	664
(vii)	Difference between Permutation and Combination	666
(viii)	Total Number of Combinations	666
(ix)	Permutation of Alike Items	666
(x)	Division of Different Items into Groups of Equal Size	666
(xi)	Circular Permutation	667
(xii)	Sum of All Numbers formed from Given Digits	668
(xiii)	Division of Identical Items into Groups	668
(xiv)	Rank of a Word	669
(xv)	Number of Dearrangements	669
(xvi)	Number of Factors	670
	Previous Years GATE & ESE Questions	695
8.2	Probability	698 – 742
(i)	Some Basic Concepts	687
(ii)	Definition of Probability	700

14. Limit of the function $\lim_{n \rightarrow \infty} \frac{n}{\sqrt{n^2 + n}}$ is
- (a) $\frac{1}{2}$ (b) 0
(c) ∞ (d) 1
- [GATE-1999; 1 Mark]

15. Value of the function $\lim_{x \rightarrow a} (x - a)^{(x - a)}$ is
- (a) 1 (b) 0
(c) ∞ (d) a
- [GATE-1999; 1 Mark]

16. $\text{Lt}_{x \rightarrow 1} \frac{(x^2 - 1)}{(x - 1)}$ is
- (a) ∞ (b) 0
(c) 2 (d) 1
- [GATE-2000; 1 Mark]

17. The limit of the function $f(x) = \left[1 - \frac{a^4}{x^4}\right]$ as $x \rightarrow \infty$ is given by
- (a) 1 (b) $\exp[-a^4]$
(c) ∞ (d) Zero
- [GATE-2000; 1 Mark]

18. What is the derivative of $f(x) = |x|$ at $x = 0$?
- (a) 1 (b) -1
(c) 0 (d) Does not exist
- [GATE-2001; 1 Mark]

19. $\lim_{x \rightarrow \frac{\pi}{4}} \frac{\sin 2\left(x - \frac{\pi}{4}\right)}{x - \frac{\pi}{4}} = \underline{\hspace{2cm}}$
- (a) 0 (b) $\frac{1}{2}$
(c) 1 (d) 2
- [GATE-2001 (IN)]

- 20.* Which of the following functions is not differentiable in the domain $[-1, 1]$?
- (a) $f(x) = x^2$
(b) $f(x) = x - 1$
(c) $f(x) = 2$
(d) $f(x) = \text{maximum}(x, -x)$
- [GATE-2002; 1 Mark]

- 21.* The limit of the following sequence as $n \rightarrow \infty$ is:
- $$x_n = n^{1/n}$$

- (a) 0 (b) 1
(c) ∞ (d) $-\infty$
- [GATE-2002-CE; 1 Mark]

22. $\lim_{x \rightarrow 0} \frac{\sin^2 x}{x}$ is equal to
- (a) 0 (b) ∞
(c) 1 (d) -1
- [GATE-2003; 1 Mark]

23. The value of the function $f(x) = \lim_{x \rightarrow 0} \frac{x^3 + x^2}{2x^3 - 7x^2}$ is
- (a) zero (b) $-\frac{1}{7}$
(c) $\frac{1}{7}$ (d) infinite
- [GATE-2004; 1 Mark]

24. If $x = a(\theta + \sin\theta)$ and $y = a(1 - \cos\theta)$, then dy/dx will be equal to
- (a) $\sin\left(\frac{\theta}{2}\right)$ (b) $\cos\left(\frac{\theta}{2}\right)$
(c) $\tan\left(\frac{\theta}{2}\right)$ (d) $\cot\left(\frac{\theta}{2}\right)$
- [GATE-2004]

- 25.* With a 1 unit change in b, what is the change in x in the solution of the system of equations $x + y = 2$, $1.01x + 0.99y = b$?
- (a) zero (b) 2 units
(c) 50 units (d) 100 units
- [GATE-2005]

- 26.* Equation of the line normal to function $f(x) = (x - 8)^{2/3} + 1$ at $P(0, 5)$ is
- (a) $y = 3x - 5$ (b) $y = 3x + 5$
(c) $3y = x + 15$ (d) $3y = x - 5$
- [GATE-2006; 2 Marks]

27. If $f(x) = \frac{2x^2 - 7x + 3}{5x^2 - 12x - 9}$, then $\lim_{x \rightarrow 3} f(x)$ is
- (a) $-1/3$ (b) $5/18$
(c) 0 (d) $2/5$
- [GATE-2006; 2 Marks]

- 28.* If, $y = x + \sqrt{x + \sqrt{x + \sqrt{x + \dots \infty}}}$, then $y(2) =$

ANSWER KEY

SOLUTIONS

Sol-1:

Using L' Hospital Rule

$$\text{Req. Limit} = \lim_{x \rightarrow 0} \frac{(e^x - 1) + xe^2 - 2 \sin x}{(1 - \cos x) + x(\sin x)} \left(\frac{0}{0} \right)$$

Again using L' Hospital rule

$$= \lim_{x \rightarrow 0} \frac{(e^x + e^x + xe^2 - 2 \cos x)}{\sin x + \sin x + x \cos x} \left(\frac{0}{0} \right)$$

Again using L' Hospital Rule

$$= \lim_{x \rightarrow 0} \frac{e^x + e^x + e^x + xe^x + 2 \sin x}{\cos x + \cos x + \cos x - x \sin x}$$

$$= \frac{1+1+1+0+0}{1+1+1-0} = 1$$

Sol-2: (c)

Using L' Hospital rule

$$\lim_{x \rightarrow 0} \frac{1 - e^{-j5x}}{10(1 - e^{-jx})} = \lim_{x \rightarrow 0} \frac{1}{10} \times \frac{5je^{-j5x}}{je^{-jx}} = \frac{5}{10} = 0.5$$

Sol-3: (d)

$$\lim_{x \rightarrow \infty} \frac{\sin x}{x} = \lim_{y \rightarrow 0} \frac{\sin 1/y}{1/y}$$

$$= \lim_{y \rightarrow 0} y \sin \left(\frac{1}{y} \right) = 0$$

$$\boxed{\lim_{x \rightarrow \infty} \frac{\sin x}{x} = 0}$$

 $(\because |\sin x| \leq 1)$ **Sol-4: (d)**

$$\begin{aligned} \lim_{x \rightarrow \infty} \left(\frac{1}{\sin x} - \frac{1}{\tan x} \right) &= \lim_{x \rightarrow \infty} \left(\frac{1 - \cos x}{\sin x} \right) \\ &= \lim_{x \rightarrow \infty} \frac{2 \sin^2 \frac{x}{2}}{2 \sin \frac{x}{2} \cos \frac{x}{2}} \\ &= \lim_{x \rightarrow \infty} \tan \frac{x}{2} = \infty \end{aligned}$$

Sol-5: (a)

$$\lim_{\theta \rightarrow 0} \frac{\sin \theta}{\theta} = 1$$

Sol-6: (a)

$$\begin{aligned} \lim_{x \rightarrow \infty} \frac{x^3 - \cos x}{x^2 + (\sin x)^2} &= \lim_{x \rightarrow \infty} \frac{1 - \frac{\cos x}{x^3}}{\frac{x^2}{x^3} + \frac{(\sin x)^2}{x^3}} \\ &= \lim_{x \rightarrow \infty} \frac{1 - \frac{\cos x}{x^3}}{\frac{1}{x} + \frac{(\sin x)^2}{x^3}} \\ &= \frac{1 - 0}{\frac{1}{\infty} + 0} = \frac{1}{0} = \infty \end{aligned}$$

$$\boxed{\lim_{x \rightarrow \infty} \frac{x^3 - \cos x}{x^2 + (\sin x)^2} = \infty}$$

Sol-7: (b)

$$\begin{aligned} f(x) &= |x + 1| \\ &= -(x + 1) \quad \text{for } x < -1 \\ &= (x + 1) \quad \text{for } x \geq -1 \end{aligned}$$

Only concern is $x = -1$

$$\text{Left limit} = \lim_{x \rightarrow -1^-} -(x + 1) = 0$$

$$\text{Right limit} = \lim_{x \rightarrow -1^+} (x + 1) = 0$$

$$\boxed{f(x) \text{ is continuous in the interval } [-2, 0]}$$

$$\text{LD} = -1$$

$$\text{Right Derivative} = +1$$

$$\boxed{\text{Hence } f(x) \text{ is not differentiable at } x = -1}$$

Alternative Solution :

It is clear from graph $f(x)$ is continuous every where but not differentiate at $x = -1$ because there is sharp change in slope at $x = -1$.

Sol-8: (b)

$$\begin{aligned} \lim_{x \rightarrow 0} x \sin \frac{1}{x} &= 0 \cdot \sin \infty \\ &= 0 \times [-1, 1] \\ &= 0 \end{aligned}$$

Sol-9: (a)

If $f(x)$ is continuous at a point $x = a$ then it may or may not be differentiable at $x = a$.

Sol-10: (a)

$$y = |x|$$

$$= \begin{cases} -x, & \text{for } x < 0 \\ x, & \text{for } x > 0 \end{cases} \quad \text{and} \quad \frac{dy}{dx} = \begin{cases} -1, & x < 0 \\ 1, & x > 0 \end{cases}$$

$$\text{left limit} = \lim_{x \rightarrow 0} (-x) = 0$$

$$\text{Right limit} = \lim_{x \rightarrow 0} (x) = 0$$

$$\therefore \text{Left limit} = \text{Right limit}$$

$$\boxed{y \text{ is continuous at } x = 0}$$

$$\text{Left derivative} = -1$$

$$\text{Right derivative} = +1$$

$$\therefore \text{Left derivative} \neq \text{Right derivative}$$

$$\boxed{\frac{dy}{dx} \text{ is discontinuous at } x = 0}$$

Sol-11: (a)

$$\lim_{\theta \rightarrow 0} \frac{\sin m\theta}{\theta} \left(\frac{0}{0} \right)$$

Apply LH Rule

$$\lim_{\theta \rightarrow 0} \frac{m \cos m\theta}{1} = m$$

Alternative Solution:

$$\lim_{\theta \rightarrow 0} \frac{\sin m\theta}{\theta} = \lim_{\theta \rightarrow 0} m \frac{\sin m\theta}{m\theta} = m(1) = m$$

Sol-12: (0.75)

Sum of the squares of natural numbers = S_2

$$S_2 = 1^2 + 2^2 + 3^2 + 4^2 + \dots + n^2$$

$$S_2 = \frac{n(n+1)(2n+1)}{6}$$

Sum of natural numbers = S_1

$$S_1 = 1 + 2 + 3 + 4 + \dots + n$$

$$S_1 = \frac{n(n+1)}{2}$$

Hence,

$$\Rightarrow \lim_{n \rightarrow \infty} \frac{\left[\frac{n(n+1)}{2} \right]^2}{n \times \left[\frac{n(n+1)(2n+1)}{6} \right]}$$

$$\Rightarrow \lim_{n \rightarrow \infty} \frac{n^2(n+1)^2}{\frac{4}{n \times n(n+1)(2n+1)}} \cdot \frac{1}{6}$$

$$\Rightarrow \lim_{n \rightarrow \infty} \frac{3(n+1)}{2(2n+1)}$$

$$\Rightarrow \lim_{n \rightarrow \infty} \frac{3}{2} \left(\frac{1 + \frac{1}{n}}{2 + \frac{1}{n}} \right)$$

$$\Rightarrow \frac{3}{4} = 0.75$$

Sol-13: (c)

$$x = \sqrt{3} \cos \theta$$

$$y = \sin \theta$$

Slope of cam profile at an angle θ is

$$\frac{dy}{dx} = \frac{dy}{d\theta} \times \frac{1}{\left(\frac{dx}{d\theta}\right)}$$

$$= \frac{\cos \theta}{-\sqrt{3} \sin \theta} = \frac{-\cot \theta}{\sqrt{3}}$$

Slope of Normal to cam profile at angle θ is

$$m = \frac{-1}{\left(\frac{dy}{dx}\right)} = \sqrt{3} \tan \theta$$

$$m = \sqrt{3} \tan\left(\frac{\pi}{4}\right)$$

$$m = \sqrt{3}$$

Angle of Normal with x-axis is

$$\alpha = \tan^{-1}(m) = \tan^{-1}(\sqrt{3})$$

$$\alpha = 60^\circ = \frac{\pi}{3}$$

Sol-14: (d)

$$\lim_{n \rightarrow \infty} \frac{n}{\sqrt{n^2 + n}} = \lim_{n \rightarrow \infty} \frac{n}{n \sqrt{1 + \frac{1}{n}}}$$

$$= \lim_{n \rightarrow \infty} \frac{1}{\sqrt{1 + \frac{1}{n}}} = 1$$

Sol-15: (a)

Let $y = \lim_{x \rightarrow a} (x-a)^{(x-a)}$

Taking logarithm on both sides.

$$\log y = \lim_{x \rightarrow a} \log (x-a)^{(x-a)}$$

$$= \lim_{x \rightarrow a} (x-a) \log(x-a)$$

$$= \lim_{x \rightarrow a} \frac{\log(x-a)}{\left(\frac{1}{x-a}\right)}$$

Apply L'H Rule = $\lim_{x \rightarrow a} \frac{1}{\frac{(x-a)}{1}}$

$$\log y = \lim_{x \rightarrow a} -(x-a)$$

$$\log y = 0$$

$$\Rightarrow y = e^0 = 1$$

Sol-16: (c)

$$\text{Lt}_{x \rightarrow 1} \left(\frac{x^2 - 1}{x - 1} \right) = \text{Lt}_{x \rightarrow 1} \frac{(x-1)(x+1)}{(x-1)}$$

$$= \text{Lt}_{x \rightarrow 1} (x+1) = 1 + 1$$

$$\boxed{\text{Lt}_{x \rightarrow 1} \left(\frac{x^2 - 1}{x - 1} \right) = 2}$$

Sol-17: (a)

$$\lim_{x \rightarrow \infty} f(x) = \lim_{x \rightarrow \infty} \left[1 - \frac{a^4}{x^4} \right]$$

$$= 1 - \frac{a^4}{(\infty)} = 1 - 0 = 1$$

Sol-18: (d)

$$f(x) = |x| = \begin{cases} x, & x > 0 \\ -x, & x < 0 \end{cases}$$

Left derivative = -1

Right derivative = +1

\therefore LD \neq RD

The derivative does not exist at $x = 0$.

Alternative Solution :

It is clear from graph $f(x)$ is not differentiable at $x = 0$.

Sol-19: (d)

$$\lim_{x \rightarrow \frac{\pi}{4}} \frac{\sin \left[2 \left(x - \frac{\pi}{4} \right) \right]}{\left(x - \frac{\pi}{4} \right)} \left(\frac{0}{0} \text{ form} \right)$$

$$= \lim_{x \rightarrow \frac{\pi}{4}} \frac{2 \cos \left[2 \left(x - \frac{\pi}{4} \right) \right]}{1} = 2$$
