PREFACE

Giving life to an engineer's dream for the betterment of society involves **Design, Drawing and Safety**. With the increasing complexities of economy, as well as the ensuing disruption in IT, besides the stringent safety rules, this inter-disciplinary subject has become quite challenging to comprehend from exam point of view.

Looking at the nature of Engineering Services Examination (ESE), and the level of questions being asked, the conventional approach of preparing through theory and examples is not enough to serve the purpose. The revised and updated edition of **General Principles of Design, Drawing and Safety** attempts to provide logical reasoning through mathematical analysis, gives a clear insight into the concepts, and paints a complete picture in front of you. For students to determine the level of their preparation, self-practice questions have been provided at the end of this book.

In their endeavour to give students the best, **Mr. Bipin Thakur** and **Mr. Himadri Shekhar (Aahil)** have brought about this book in an easy-to-grasp language that gives in a complete clarity of thought. As a result, what students get is their collective wisdom that breaks free the constraints of engineering students in appreciating the basics of Design, Drawing and Safety.

As you flip over the pages of this book, you would come across a slew of diagrams, flow charts, mind maps and tables. This book is a delight for every ESE aspirant as it communicates, connects, and builds upon the exam preparedness right up to the standards of the UPSC.

CONTENTS

Section	Description	Page No.
	<i>Preface</i>	<i>(iii)</i>
	Engineering Drawing	01-127
Chapter 1	INTRODUCTION TO ENGINEERING DRAWING	1 – 9
1.1	Introduction	1
1.2	Drawing Sheets	1
1.3	Drawing Board	2
1.4	Scales	3
1.5	Mini Drafter	3
1.6	T-Square	3
1.7	Set Square	3
1.8	Protactor	4
1.9	Compass	4
1.10	Dividers	5
1.11	Drawing Pencil	5
1.12	French Curves	5
1.13	Layout of a Drawing Sheet.....	6
Chapter 2	LINES, LETTERING AND DIMENSIONING	10 – 23
2.1	Lines	10
2.2	Lettering	11
2.3	Dimensioning	12
2.4	Methods of Dimensioning	13
2.5	Arrangement of Dimensions	14
2.6	Dimensioning of Various Objects	14
2.7	Symbols and Abbreviations Used in Dimensioning	17
2.8	General Rules of Dimensioning	17
Chapter 3	GEOMETRICAL CONSTRUCTIONS	24 – 29
3.1	Introduction	24
3.2	Basic Geometrical Shapes	24

Chapter 4	SCALES	30 – 37
4.1	Introduction	30
4.2	Size of Scale	30
4.3	Representative Fraction (R.F.)	31
4.4	Units of Length and their Conversion	31
4.5	Types of Scales	32
Chapter 5	ENGINEERING CURVES	38 – 63
5.1	Introduction	38
5.2	Conic Sections or Conics	38
5.3	Special Curves	45
5.4	Plane Curves	45
5.5	Space Curves	58
Chapter 6	THEORY OF PROJECTIONS	64 – 79
6.1	Introduction	64
6.2	Projection Methods	64
Chapter 7	PROJECTIONS OF POINTS	80 – 87
7.1	Introduction	80
7.2	Locations of a Point	81
7.3	Summary	85
Chapter 8	PROJECTIONS OF LINES	88 – 103
8.1	Introduction	88
8.2	Bis Conventions for Projection of Lines	88
8.3	Different orientation of lines and their projections	88
8.4	Traces of a line	98
8.5	Auxiliary Plane Projection Method	99
Chapter 9	PROJECTION OF PLANES	104 – 110
9.1	Introduction	104
9.2	Orientation of Planes and their Projections	104
Chapter 10	PROJECTIONS OF SOLIDS	111 – 122
10.1	Introduction	111
10.2	Right Solid	111
10.3	Frustums and Truncated Solid	112
10.4	Orientation of Solid and their Projections	113

Engineering Safety 218-284

Chapter 1	INTRODUCTION	218 – 222
1.1	Safety	218
1.2	What is an Accidents	218
1.3	Accident Causation Theories	219
Chapter 2	HAZARD AND HAZARD ANALYSIS	222 – 230
2.1	Introduction	222
2.2	Hazard Analysis Methods and Techniques	223
2.3	Hazard Control	229
Chapter 3	RISK ANALYSIS AND MANAGEMENT	230 – 234
3.1	Risk Management	230
3.2	Risk Analysis Process and Methods	232
3.3	Role of 'IT' in Health and Safety Management	233
3.4	Social Dimension of Risk-Contemporary Thinking	233
3.5	Evaluating Risk in Design	233
3.6	Risk Control Measures	234
Chapter 4	HUMAN FACTORS IN SAFETY	234 – 237
4.1	Job Stress	234
4.2	Occupational Stressors and Workplace Stress Effects	234
4.3	Physical Stress Influencing Factors	235
4.4	Human Operator's Stress Characteristics	235
4.5	Worksite Analysis Program for Human Factors	236
Chapter 5	SAFETY MANAGEMENT PRINCIPLES	237 – 244
5.1	Introduction	237
5.2	Safety Management Principles	238

5.3	Responsibilities Non-Safety Managers	239
5.4	Safety Committees	239
5.5	Improving the Workplace Ergonomics	240
5.6	Safety Audit	241
5.7	Safety Survey	243
5.8	Emergency Preparedness and Response Planning (EPRP) in Major Accident Hazard Factories	243
Chapter 6	INITIATIVES TOWARDS SAFETY – GOI	244 – 252
6.1	Existing Set-up of Occupational Safety and Health in the Workplace in India	244
6.2	Government Bodies Dealing with OSH Regulations	245
6.3	National Level Autonomous Bodies/Organizations Connected with Occupational Safety & Health	246
6.4	12th Five Year Plan Schemes in Respect to Safety	247
6.5	Existing Scenario of Occupational Safety and Health in Various Segments of Unorganised Sector	248
6.6	Relevant Legislation in India	251
Chapter 7	MISCELLANEOUS	253 – 270
7.1	Occupational Health Problem	253
7.2	International Labour Organization (ILO)	254
7.3	OSHA [Occupational Safety and Health Administration]	254
7.4	Construction Safety	254
7.5	Structural Failure Prevention	263
7.6	Woodworking Machines	263
7.7	Concrete Mixers	263
7.8	Concreting Pumping-System	264
7.9	Special Building Operations	264
7.10	Steel Structure Erection	264
7.11	Work on Tall Chimneys	264
7.12	Elevator Safety	265
7.13	Boiler Safety	265
7.14	Road Traffic Safety	266
7.15	Nuclear Safety	267
7.16	Fire Safety	267
7.17	Dam Safety	268
7.18	Safety During Demolition	269
GLOSSARY		271-275

CHAPTER

1

Introduction to Engineering Drawing

1.1 INTRODUCTION

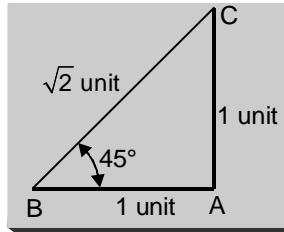

INSIDE

- 1.1 Introduction
- 1.2 Drawing Sheets
- 1.3 Drawing Board
- 1.4 Scales
- 1.5 Mini Drafter
- 1.6 T-Square
- 1.7 Set Square
- 1.8 Protactor
- 1.9 Compass
- 1.10 Dividers
- 1.11 Drawing Pencil
- 1.12 French Curves
- 1.13 Layout of a Drawing Sheet

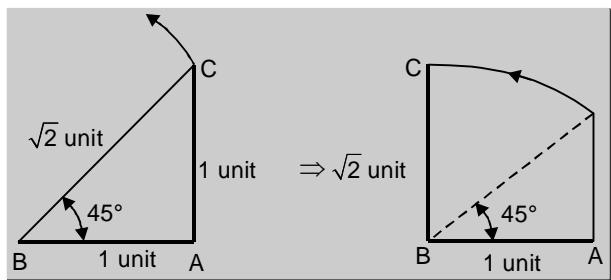

Engineering drawing is a technique of creating graphical representation that contains all necessary information such as dimensions, specifications and notes using which an abstract concept can be transformed into real world object. To realize such concept, basic tools of construction of drawing has to be clearly understood as to what standard has to be followed. There is an international standard on code of practice for drawing which is followed and adopted by Bureau of Indian Standard (BIS). In this chapter, we shall be dealing with drawing instruments and accessories (i.e. drafting tools) which is necessary for engineering drawing.

1.2 DRAWING SHEETS : [IS 10711 : 2001]

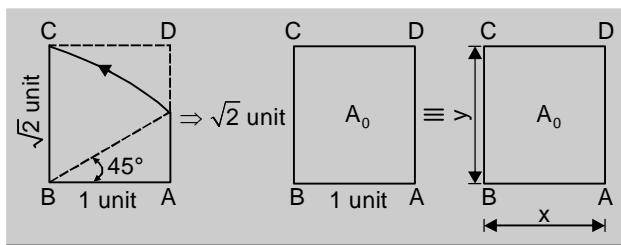

Consider an isosceles triangle ABC of unit length as shown below.

Now rotate BC anticlockwise so that BC becomes perpendicular to AB as shown below.

Now taking AB as one side and BC as another side complete a rectangle ABCD as shown below.

There are two basic principles involved in arriving at the sizes of A_0 sheet

- $x : y = 1 : \sqrt{2}$, where, $x, y \in$ side
- Surface area (xy) of A_0 sheet is unity i.e., $xy = 1$

$$\begin{aligned} \therefore x:y &= 1:\sqrt{2} \\ \therefore \frac{x}{y} &= \frac{1}{\sqrt{2}} \\ \Rightarrow y &= x\sqrt{2} \quad \dots (i) \end{aligned}$$

$$\text{Also, } xy = 1 \Rightarrow x \cdot x\sqrt{2} = 1 \text{ from (i)}$$

$$\Rightarrow x^2 = \frac{1}{\sqrt{2}} \Rightarrow x = \frac{1}{\sqrt{\sqrt{2}}} = \frac{1}{1.189}$$

$$\Rightarrow x = 0.841 \text{ m}$$

$$\therefore y = 0.841\sqrt{2} = 1.189 \text{ m}$$

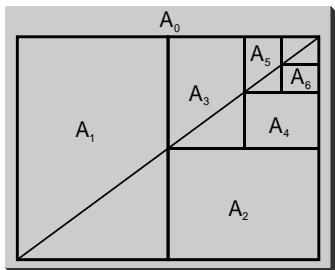

Hence, value of x and y is given as

$$x = 0.841 \text{ m} \quad (\text{or}) \quad 841 \text{ mm}$$

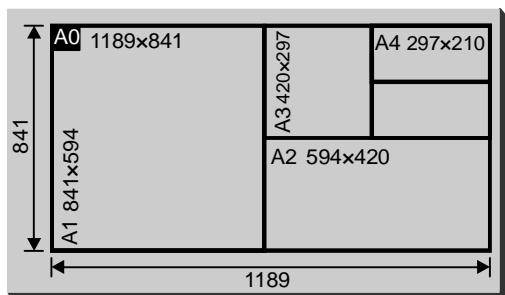

$$y = 1.189 \text{ m} \quad (\text{or}) \quad 1189 \text{ mm}$$

Successive smaller sizes are obtained by halving previous size sheets, with the above constant width to length ratio i.e., $(x : y = 1 : \sqrt{2})$

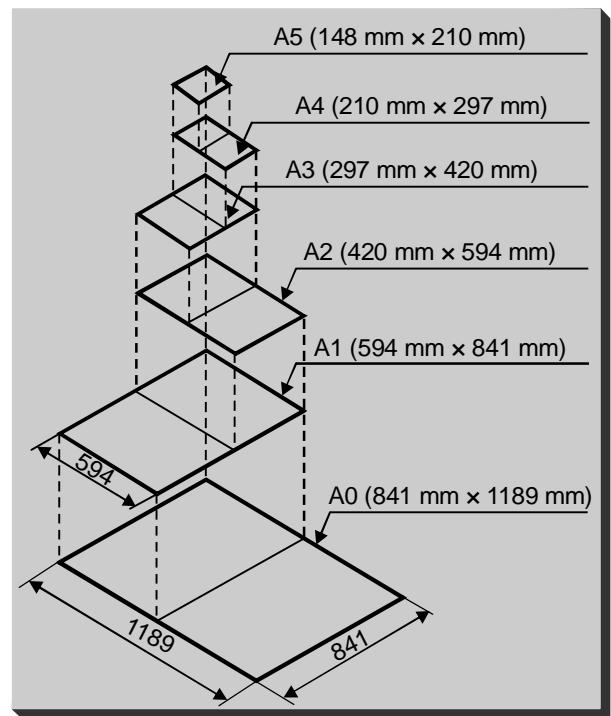

Example :

2-D view

3-D view

Note: The ISO 'A' series of sheet is based on a constant width to length ratio of $1 : \sqrt{2}$.

Application

The relationship of $1 : \sqrt{2}$ is particularly important for reduction onto microfilm, or reduction and enlargement on photocopiers. All metric equipment including microfilm cameras, microfilm printers, photocopiers and even drawing pen sizes are designed around this ratio.

- Note:** (1) A2 size drawing sheet is preferred for class use.
 (2) Recommended size and its designation of ISO 'A' series of sheet is given below.

Table 1.1: Recommended size of drawing sheets

Drawing Sheet (IS 10711 : 2001)	
Designation	Size (mm) Length × Width
A0	1189 × 841
A1	841 × 594
A2	594 × 420
A3	420 × 297
A4	297 × 210

1.3 DRAWING BOARD : [IS 1444 : 1989]

It is generally made from soft wood such as white pine, fir, oak, red cedar etc.

- To prevent warping, the board should be made of narrow strips of wood joined together accurately.

- Ebony strip fitted to the left side of drawing board provides the guide for the T-square.

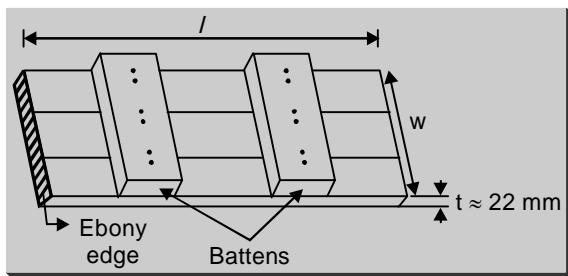

Table 1.2 : Recommended sizes of drawing boards.

Drawing Board (IS 1444 : 1989)		
Designation	Size (mm) Length x Width	Recommended for use with sheet sizes
D0/B0	1270 x 920	A0
D1/B1	920 x 650	A1
D2/B2	650 x 470	A2
D3/B3	500 x 350	A3

Note: D2 size drawing board is normally used for class work.

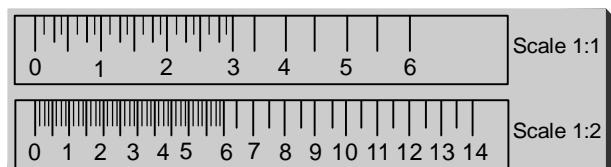

1.4 SCALES

The word 'scale' is usually employed for an instrument used for drawing or measuring the length of a straight line. It is also used to represent the proportion in which the drawing is made with respect to the object. It is used to make full size, reduced size or enlarged size drawing conveniently depending upon the size of the object and that of the drawing sheet. As recommended by Bureau of Indian Standards (BIS) there are eight set of scales. These are designated from M1 to M8 as shown in Table 1.3.

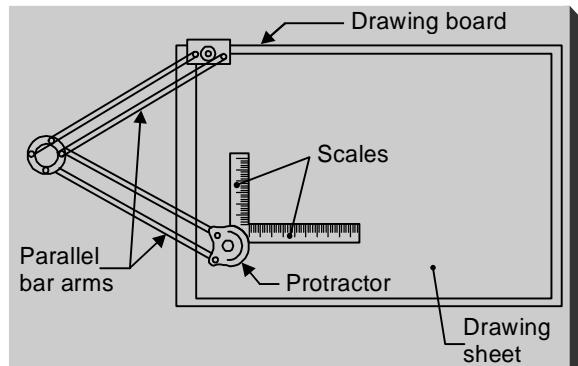

Table 1.3 : Designation and description of Engineer's scale

Designation	Description	Scale
M1	Full size	1 : 1
	50 cm to a metre	1 : 2
M2	40 cm to a metre	1 : 2.5
	20 cm to a metre	1 : 5
M3	10 cm to a metre	1 : 10
	5 cm to a metre	1 : 20
M4	2 cm to a metre	1 : 50
	1 cm to a metre	1 : 100
M5	5 mm to a metre	1 : 200
	2 mm to a metre	1 : 500
M6	3.3 mm to a metre	1 : 300
	1.66 mm to a metre	1 : 600
M7	2.5 mm to a metre	1 : 400
	1.25 mm to a metre	1 : 800
M8	1 mm to a metre	1 : 1000
	0.5 mm to a metre	1 : 2000

For example, a length designated as 2 cm on a 1 : 2 scale is equal to the length designated as 1 cm on a 1 : 1 scale.

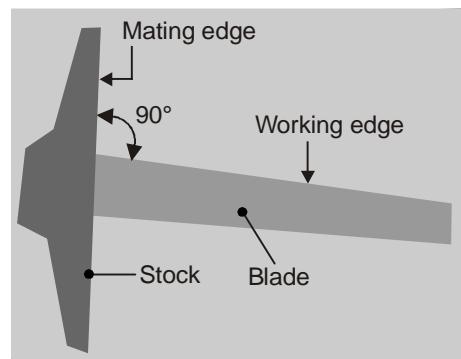

1.5 MINI DRAFTER

- It combines the function of a T-square, set square, scales and protractor.
- It is used for drawing horizontal, vertical, inclined, parallel, perpendicular lines along with its measurement.
- It is also used to trace angle.

1.6 T-SQUARE

It is a T-shape drawing tool whose mating edge slide along width of drawing board with the help of stock. It is useful in drawing primarily horizontal lines and also used for guiding the set squares while drawing vertical or inclined lines.

1.7 SET SQUARE

A pair of right angled triangle is called set squares. A set square has either 45°-45° angle or 30°-60° angle. The 45° set square shown below in fig. (a) is a right-angled triangle having acute angles of 45°. The 30°-

Questions

Choose the most appropriate answer out of the given alternatives :

1. A drafter helps in drawing
 - (a) parallel and perpendicular lines
 - (b) concentric circles
 - (c) smooth curves
 - (d) all the above
2. In the engineering system of paper sizes, which of the following is "A2" size?
 - (a) 841 mm × 1189 mm
 - (b) 594 mm × 841 mm
 - (c) 420 mm × 594 mm
 - (d) 210 mm × 297 mm
3. Which of the following pencil leads is hardest?
 - (a) HB
 - (b) H
 - (c) B
 - (d) F
4. Which of the following purposes is **not** served by dividers?
 - (a) Divide lines or curves into a number of equal parts
 - (b) Transfer measurement from one part of the drawing to another part
 - (c) Make full size, reduced size or enlarged size drawing
 - (d) Step-off a series of equal distances on the drawing
5. To draw smooth curves of any nature, the draughting instrument used is
 - (a) mini-drafter
 - (b) French curve
 - (c) templates
 - (d) eraser shield
6. Parallel lines can be drawn with the help of
 - (a) mini-drafter
 - (b) T-square
 - (c) pair of set squares
 - (d) all of these
7. A typical layout of a drawing sheet **does not** contain
 - (a) centering mark
 - (b) orientation mark
 - (c) trimming marks
 - (d) identification mark
8. Grid references on a drawing sheet provide the following information:
 - (a) Location of details, additions, modifications, revisions, etc. of drawing
 - (b) To facilitate the positioning of the drawing when reproduced
 - (c) To facilitate brief record and initials of the person responsible
 - (d) To facilitate trimming
9. "A" series of paper has length-to-width ratio of approximately
 - (a) 3:2
 - (b) $\sqrt{3} : 1$
 - (c) $\sqrt{2} : 1$
 - (d) 5:3
10. The number of orientation marks generally contained by a drawing sheet is
 - (a) one
 - (b) two
 - (c) three
 - (d) four
11. Extension arms are used with engineering compasses to
 - (a) draw circles of larger diameter
 - (b) increase the gripping arm
 - (c) adjust distance between the legs
 - (d) increase accuracy
12. Which of the following statements are correct?
 - I. The length of A2 size drawing sheet is equal to the width of A1 size drawing sheet.
 - II. For technical drawing, harder grades of pencils are preferred.
 - (a) only I
 - (b) Only II
 - (c) Both
 - (d) None

ANSWER KEY

1.	(a)	5.	(b)	9.	(c)	13.	(b)	17.	(b)	19.	(d)
2.	(c)	6.	(d)	10.	(b)	14.	(b)	18.	(a)	20.	(c)
3.	(b)	7.	(d)	11.	(a)	15.	(d)				
4.	(c)	8.	(a)	12.	(c)	16.	(b)				

EXPLANATIONS

- 12.** (c) Length of A2 size drawing = 594 mm.
Width of A1 size drawing sheet = 594 mm
Hence, given statement is true.
For technical drawing, three grades of pencils are used. Those are H, 2H, HB. All these are hard grades pencils.

13. (b)
A D2 size drawing board has dimensions of 650 mm x 470 mm. The given size in the question is of D1 drawing board.
A title block is placed at bottom right corner of

14. (d) the drawing frame and it is divided into two zones.
(i) Part identification zone
(ii) Additional information zone.

15. (d) Bow compasses are suitable to draw circles or arcs using pencil. To draw a circle of diameter smaller than 25mm bow pencil compass is preferred.

15. (d) French curves is used to draw smooth freedom curves.

Download IES Master App for FREE!

Pocket the Knowledge

As a maverick ESE/GATE platform, we embark upon being your learning partner, in your pursuit of excellence.

True to the likings of engineering students, here, information comes crisp, compact and exact, accompanied by myriad of illustrations that one's eyes can feast upon, and brain to exercise and hone its capabilities. We believe that illustrations speak louder than words; and figurines communicate faster than complex wordy pages.

As your eyeballs roll through the app, concepts on all topics – from Material Science to Currents, right from the ESE and GATE toppers - shall come alive before you.

In the swarm of devices based on touch-based, smart technology, IES Master App literally manifests its belief that a right 'touch' can change one's world.
